

Try out the knobs or pulls before you purchase the entire kitchen.

Touch it, feel it, fit your hand inside the pull. Does it fit? Does it feel nice? You should be able to know all those answers before you buy for your job.

Ask about our PRO board program. Each hardware board showcases a group of desired knobs or pulls associated with the design group, allowing customers a chance to mix and match.

Try them out; it will be **WURTH** the extra research.

BUDGET FRIENDLY OPTIONS FOR ANY DESIGN

Since most cabinets are not sold with hardware, it's up to the customer on selecting which knobs and pulls to pair with their design. This is not always the easiest decision, since there are so many unique styles and finishes to choose from. To help you on your search for the perfect hardware for your cabinets, here are some ideas designed to help stay within budget!

Note the cabinet style, countertop edge, lighting fixtures and any other **important design elements.**

Square style hardware can still be round in shape, with square contours. These are more contemporary.

Curved style hardware has soft edges and more detail. These are more traditional or transitional.

Function and **beauty** are good reasons to love knobs.

We all know that kitchens get messy on a daily basis, and preventing that mess from ending up on your cabinet surface is important for its longevity. Knobs and pulls help to protect your cabinet finish because you are not transferring the oils on your fingers to the cabinet fronts.
